

USDT (ERC20) USDT (TRC20)

A Tether Mixer, also known as a Tether Tumbler is an online service helping tether owners to regain privacy over there USDT

The best way to buy cryptocurrencies such as Tethers is through a so-called "Exchange". Exchange would be used for Tether selling their assets and after verifying their identity. In providing this exchange with a official ID card.

The process described as a security feature, is actually a trick from the governments forcing those exchanges to collect and share their personal information with them.

Since that done and because the information is not used by Tether in public, avoid having your ID card for sale to match your wallet and use their own crypto to use your funds.

However, there is a legal way to purchase your crypto privacy. It's called a Tether [USDT Mixer](#).

How does tether mixer work?

Tether Mixer uses different address (private and semi) to mix assets.

They will use one of their liquidity pool to receive your USDT or TRX or other cryptocurrencies.

Then they will use another of their liquidity pool to provide you with other cryptocurrencies.

Therefore, the mixer you will receive on your own wallet after that mixing procedure will not be related to your original transaction.
